

Get through a difficulty

Takase Tomoko
General principal

We appreciate that many parents and people in this community came to see children's original works at the school exhibition. Each work is full of each student's idea. The gym became a small art museum. Children got to know each other better through appreciating others' works.

Fussa city's music concert was held last Friday. The 6th grader sang with a beautiful voice and the ensemble was also good. They showed their abilities well.

Well, there is only one month left this term. Children have grown through everyday study and life. I want them to get through a difficulty by themselves.

There is the proverb, "Spare the rod and spoil the child (The child you love should be made to experience traveling)". This proverb is made in the era when people must walk to the destination by getting through a difficulty. "To be made to experience traveling" means to be made to experience difficulties.

We spend not only happy days but also difficult days in our life. And we need to get through the difficulties. We can get confidence and power to overcome through painful experiences.

It is important to get close to your child, but if you help too much by making preparations in advance for your child, it may lose a chance for your child to grow. Efforts and endurance are sometimes necessary to grow. It says "The span of life is 100 years". I want each child to create each future.
